PLEASE NOTE

Actual stone colors should be viewed by the homeowner before purchasing. All paver sizes are nominal and should be pre-measured when doing a job where exact dimensions are critical. Product dimensions are height by face length by depth. Actual dimensions and weights may vary from these approximate values due to variations in manufacturing processes.

FREQUENTLY ASKED QUESTIONS:

Q: CAN CHATHAM BE USED IN ALL APPLICATIONS?

A: It can be used in all but driveways and other areas with vehicular traffic.

Q: IS CHATHAM A PERMEABLE PAVER?

A: No, it is not.

Q: IS THERE A PATTERN FOR INSTALLATION?

A: There is no set pattern for Chatham. It is a modular system to be installed randomly.

Q: WITH THE LARGER UNITS, DOES CHATHAM NEED TO BE INSTALLED DIFFERENTLY?

A: Chatham XL is a heavier unit that may require two people to install. Proper lifting techniques should be practiced or the use of slab handling/ vacuum equipment may be preferred.

IMPORTANT NOTE REGARDING CHATHAM TAMPING

Pavers with dimpled or textured surfaces have high and low points on the surface which lend a more natural aesthetic appeal to the paver. These pavers are susceptible to surface scuffing when being compacted in place with plate compactors. Therefore, these paver types should always be compacted with a plate compactor that incorporates a protective mat or other medium between the plate compactor and the surface of the paver. These protect mediums include rubber matting, thin carpet, mirafi 500x or cardboard.
