Beautifully Placed Confidence™

As a family-owned business, Eagle Bay operates on a unique set of values. Trust means everything to us, and we earn it by offering the finest products and services. We understand that we’re not just making hardscape products, we’re creating peace of mind.
The bold look and easy installation of the Diamond® 10DS retaining wall system have long made it the obvious choice for residential and light commercial wall projects. The rough-hewn face lends versatility to this landscaping tradition. The rear-lip locator provides uniform installation and reduces labor costs. The system is completed with a complementary cap unit.

- Gravity walls can be built up to 3 feet 6 inches high, including buried course
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex™ retaining wall system when designed by a qualified engineer
- Minimum outside radius, measured on the top course to the front of the units: 2 feet
- Minimum inside radius, measured on the base course to the front of the units: 4 feet

### CAP POSSIBILITIES:

- **XL™ CAP**
  - Square shape (rough hewn, 2 sides)
  - FRONT: 18" x 13" x 3" (tall)

**FREQUENTLY ASKED QUESTIONS:**

**Q:** Why does the 10DS now have cores?
**A:** Increased structural integrity and less contractor fatigue.

**Q:** Will the wall be as strong and just as functional with this product?
**A:** Yes! Increased strength with 57 stone in the cores.

**Q:** What is the greatest advantage of using the 10DS?
**A:** 10DS is 24 lbs. lighter per unit meaning less contractor lifting and increased productivity per day.

**Q:** How much 57 stone does it take to fill the cores?
**A:** .19 cubic feet per unit.

**Q:** Do I need to buy caps?
**A:** Yes. It is an NCMA Requirement which creates increased profit opportunities and is an aesthetically pleasing finished project.
