## FIRE PIT KITS

### FEATURES AND BENEFITS

- AVAILABLE IN ROUND OR SQUARE
- TUMBLED LOOK COMPLEMENTS ANTIQUED AND COBBLED PAVERS
- WOOD BURNING OR CAN BE FITTED FOR NATURAL GAS AND PROPANE
- VERY DIY-FRIENDLY DUE TO ITS LIGHT WEIGHT

# Dublin™

## FIRE PIT KITS

### DUBLIN™ SQUARE FIRE PIT KIT

BASE: 56" x 56" (outside)  
40.25" x 40.25" (inside)  
TOP: 60" x 60" (outside)  
36.25" x 36.25" (inside)  
OVERALL HEIGHT: 16"

Extend and enhance your outdoor entertaining season with our new Dublin™ Fire Pit Kit. The Dublin™ Fire Pit Kit comes in a tumbled finish and is the perfect addition to any outdoor space. Like the Aspen Stone®, Highland Stone®, and other fire pit kits, this easy-to-build kit includes everything you'll need to build a beautiful free-standing fire pit. Conveniently shipped on one pallet, our fire pits can be used to burn wood or be fitted for natural gas and propane.

- Works with all styles—whether you are adding to an existing setup or starting anew.
- The size and weight of the wall unit make installation easy, even for DIY'ers.
- Available in Tan or Gray. Brown available for Round only.

### Colors Available

Actual stone colors should be viewed by the homeowner before purchasing. All paver sizes are nominal and should be pre-measured when doing a job where exact dimensions are critical. Product dimensions are height by face length by depth. Actual dimensions and weights may vary from these approximate values due to variations in manufacturing processes.

PRODUCT	POUNDS per the cube	PIECES per the cube	SQ. FT. per the cube	Tan	Gray	Brown
DUBLIN™ Fire Pit Kit Square	1,906 (29 lb. per block)	72	21.3	•	•	
DUBLIN™ Fire Pit Kit Round	2,170 (27 lb. per block)	80	26.61	•	•	•

### DUBLIN™ ROUND FIRE PIT KIT\*

61" (outside diameter)  
45" (inside diameter)  
OVERALL HEIGHT: 20"

\*CAP SOLD SEPARATELY IN BROWN AND GRAY.

## DUBLIN™ FIRE PIT KIT INSTALLATION TIPS

Just about anyone can install a Dublin™ Fire Pit Kit, but because there is lifting, hauling, digging, and cutting involved, it is important to wear work gloves, knee pads, a back support belt, safety glasses, and ear plugs, as well as to practice proper lifting techniques.

### SURFACE PREPARATION

Dig an area that extends 4 inches wider than the fire pit, and 2 inches below the surface. Add gravel and compact the surface until it is level and flush with the ground. If you are setting the fire pit on pavers, place directly onto the surface and add 2-3 inches of sand to allow for proper drainage.

### ROUND FIRE PIT KIT INSTALLATION

Place 16 blocks in a circle and repeat for all 5 layers, making sure each layer is staggered so the joints don't line up.

### SQUARE FIRE PIT KIT INSTALLATION

#### STEP 1: LAY TIER 1

Using the diagram below, lay out 16 blocks in a rectangular design so that the outside diameter is 56" x 56". Make sure that this is level and brush the top of the block. For extra stability, apply a small bead of concrete adhesive to this tier and to every subsequent tier hereafter.

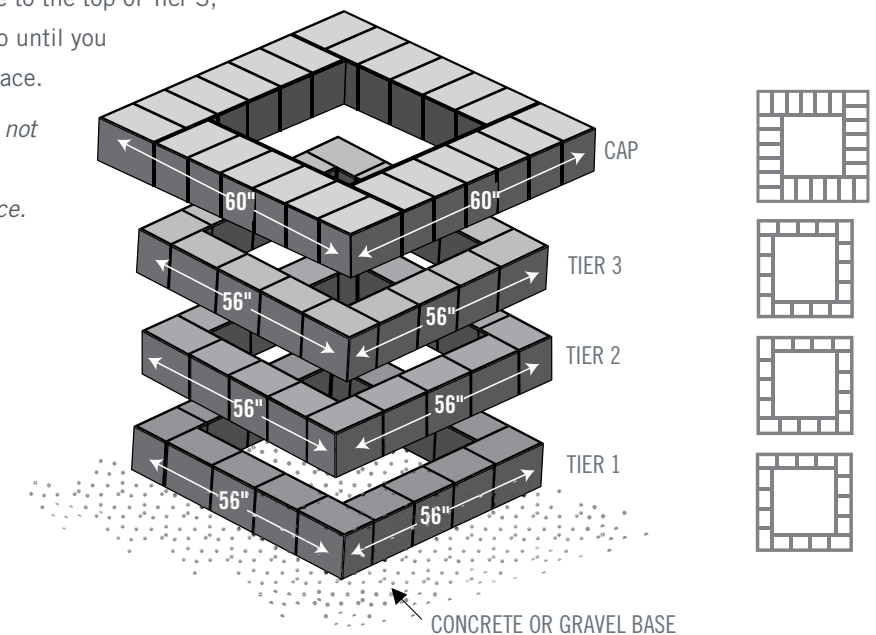

#### STEP 2: LAY TIERS 2 & 3

Reverse the Tier 1 pattern and lay Tier 2 using 16 blocks (add adhesive if desired). Repeat this step for Tier 3 (add adhesive if desired). The tier reversal is done to offset the joints, thus giving a better look to your fire pit.

#### STEP 3: CAPPING

Place 24 blocks perpendicular to the other tiers. This creates the cap for the fire pit. Start on one corner and place 6 blocks. Turn the block 90 degrees and place 6 more. Continue for the remaining two sides. Remove each cap one by one, apply adhesive to the top of Tier 3, and reset the cap. Continue doing so until you have glued all of the cap block in place.

*NOTE: Even if the previous tiers were not glued, Eagle Bay highly recommends gluing the caps to keep them in place.*

**QUICK TIP:** Need a custom-sized fire pit to fit your outdoor space? Make your fire pit any size using standard cubes of Dublin™ freestanding wall in place of the standard kit.
