Hardscapes for Easy Living™

As a family-owned business, Eagle Bay operates on a unique set of values. Trust means everything to us, and we earn it by offering the finest products and services. We understand that we’re not just making hardscape products, we’re creating peace of mind.
Dublin Fireplaces
TRADITIONAL, SEE-THROUGH & WOODBOX

Extend and enhance your outdoor entertaining season with our new Fireplace Kits. The Fireplace Kits come in a tumbled finish and are the perfect addition to any outdoor space. This easy-to-build kit includes everything you’ll need to build a beautiful freestanding fireplace. Conveniently shipped on one pallet for the Woodbox, two pallets for the Traditional and three pallets for the See-Through, our fireplaces can be used to burn wood or be fitted for natural gas and propane.

- Works with all styles—whether you are adding to an existing setup or starting anew.
- The size and weight of the block make installation easy, even for DIY’ers.
- Available in James River or Chesapeake.

PRODUCT USAGE / DISCLAIMER

- All Block, Coping, lintel, Firebrick and Caps that are needed for completion
- Detailed, easy to follow, step-by-step manual with diagrams
- Two pairs of Eagle Bay gloves
- Two tubes of adhesive for Coping and Firebrick (where applicable)

FIREPLACE INSTALLATION TIPS

Just about anyone can install a Fireplace Kit, but because there is lifting, hauling, and possibly digging involved, it is important to wear work gloves, knee pads, and a back support belt, as well as to practice proper lifting techniques.

BEFORE YOU GET STARTED:
- Have a tape measure handy at all times.
- Lay block left-to-right or back-to-front instead of outside-to-in. Laying block outside to in will make it difficult to place the inner blocks.
- When unloading the pallet, place the removed block at two to three feet from the pallet, leaving a clear path on all sides of the pallet. This will ensure easy access to the pallet at all times. And if you want to make it extra easy on yourself, group alike blocks together for quick reference — A’s together, B’s together, etc.
- Be gentle with the CopingStone. It’s delicate and may break if handled too roughly.
- Make sure the letters on each block face a connecting block so they are hidden.
- Once each course has been placed, make sure you tighten it up by using a rubber mallet on the edges.
