CircleStone Installation

1. For ease of installation, the CircleStone kit contains just 5 different shapes
2. Each Circle Kit makes one 9.35’ diameter circle
3. Kit cannot be divided to make multiple smaller circles
4. Due to the production process, there will be extra stones left over
5. To make a larger circle, expand by using CottageStone 6” x 6” pavers

*Gaps may appear. Distribute evenly over entire radius before filling with sand.
**Small rectangle included. Can be used on outer ring.
