EcoBay Permeable Pavers

The EcoBay permeable paver fits any design with its traditional shape. The benefit of this paver is more than its good looks. The innovative properties of this permeable system work to improve the quality of our water and reduce the negative effects of stormwater runoff.

**FINISHES**

- **Chamfered**: Flat face, beveled edges.

**In Stock Colors**
EcoBay Permeable pavers are designed to allow you to smartly maintain and manage the natural ecology of an outdoor space by controlling non point-source pollution and erosion caused by runoff. EcoBay Permeable pavers provide effective storm water management by naturally filtering contaminants, facilitating replenishment of the water table or allowing rainwater to be harvested. EcoBay Permeable pavers meet or exceed all ASTM standards and are suitable for use in varying weather conditions.

The system installed will capture first flush pollutants. The system is called BASS (Bio-Aquifer Storm System) which will remove TSS Solids (soils), Phosphorus, Nitrogen and Heavy Metals from Stormwater runoff. These types of pollutants are responsible for fish kills and the deterioration of wildlife’s natural habitat. The BASS System also slows the conveyance of stormwater runoff that causes erosion of stream, lake and river banks.

**FEATURES**

- Available by special order with our signature Permavision™ finish that produces a rich color, distinctive texture and wear-resistant surface
- Accomodates a minimum of 100" per hour surface infiltration
- Palletized layers for mechanical lay and easy hand installation
- Full perimeter 3/8” joint width (meets American Disabilities Act guidelines)
- Hidden paver spacer bars for maximum aesthetics
- 80mm for commercial and residential application
- Pallet includes half size units

Eagle Bay’s aesthetically pleasing and environmentally-friendly EcoBay Permeable Pavers can help you qualify for LEED credits. Consult your local Eagle Bay sales representative to find out more.

**MR Credit 4.1**  
Recycled Content (1 point)

**MR Credit 4.2**  
Recycled Content (Credit 4.1, plus 1 point)  
20% (post-consumer and ½ pre-consumer).

**MR Credit 5.1**  
Regional Materials (1 point)

**MR Credit 5.2**  
Regional Materials (Credit 5.1, plus 1 point)  
20% extracted, processed and manufactured regionally.

**SS Credit 6.1**  
Storm Water Design: Quality Control (1 point)  
Storm water management of a building site where the existing impervious area is greater than 50% and the runoff rate and quantity is reduced by at least 25%

**SS Credit 6.2**  
Storm Water Design: Quality Control (1 point)  
A treatment system designed to remove 80% of the average annual post-development Total Suspended Solids (TSS) and 40% of the average annual post-development Total Phosphorus (TP).

**SS Credit 7**  
Heat Island Effect (1 point)
